

GDPR and cybersecurity strange bed fellows or hand in glove?

Erik de Jong – Chief Research Officer, Fox-IT

Octopus

compartments / smoke detectors / fire brigade

What about GDPR, Sherlock?

Link with GDPR

- 1 Reasonably quick detection
- 2 Are personal data involved?
- 3 Scope of compromise? (a/k/a “the questions”)
- 4 How did you do?

But wait, there's more!

You can't keep everyone out -> GDPR

1 If you don't prevent most, it's going to be a party (but not yours)

2 If you don't prepare, you won't have the answers

3 If you don't do the detecting yourself, you'll find out (awkward!)

4 If you don't respond adequately, you won't have the answers
